HARVEYTHATCH Product Brochure

If it doesn't say **Harveytile** it's not a Harveytile

HARVEYTHATCH

Combine the best of both worlds...

Natural thatch creates a cosy, warm atmosphere and is loved for giving a sense of character inside and outside the home. But it is also known for being expensive, high maintenance and risky – especially in high fire or lightning areas.

Introducing HarveyThatch: a durable innovation which matches the best features of natural thatch without any of the drawbacks.

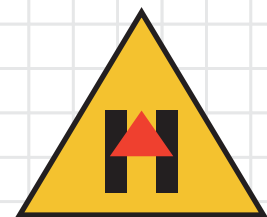

HarveyThatch is a durable, flexible light weight steel tile, creating the look and feel of natural thatch.

PLANNING A NEW THATCHED ROOF?

Know your options and the implications before you begin. Thatch roofs require combing and repairing approximately every two years, make insurance more expensive and may require special and expensive lightning conductors.

RE-ROOFING AN EXISTING THATCH ROOF?

Everything that applies to new thatch roofs apply to re-roofing... and the hassle and disruption inside a home or building can be very invasive and cumbersome. Re-roofs using HarveyThatch are hassle-free as the existing thatch is left in place ensuring no disruption to the interior of the building, and retaining the natural warmth.

IS A HARVEYTILE**

THE IDEAL ROOFING SOLUTION

HarveyThatch is an advanced product which gives you all the benefits of natural thatch. HarveyThatch has been successfully used on roofs worldwide and in many different climates. This has earned it the reputation as the superior steel tile solution.

THE PROBLEMS OF NATURAL THATCH:

- Natural degradation limits the lifespan of the thatch itself
- Damage caused by birds and vermin
- Damage from constant exposure to the elements, including wind and hail
- Increased fire risk
- Lightning hazard

HARVEYTHATCH DOES NOT HAVE ANY OF THESE DRAWBACKS

- Easily withstands the elements
- Bird, vermin, algae and fungi proof
- Lightning safe
- Reduced fire hazard
