Thinking Thatch? Think Harvey Thatch

Love the charm. Not the maintenance.

Nothing matches the bush feel of thatch. It creates a warm atmosphere and is loved for giving a sense of character inside and outside the home, but ongoing maintenance, re-thatching, fire and lightning risk reduces the charm of natural thatch.

Harvey Thatch solves all these natural thatch roof problems by retaining the African look you love without the inherent drawbacks. Whether it's a new roof or re-roof, Harvey Thatch is installed over a layer of natural thatch so you still enjoy the charm and insulation properties within your home. As a durable, flexible light weight steel tile, Harvey Thatch provides excellent functional benefits.

Natural Thatch

Know your options and the implications before you begin. Natural thatch requires combing, maintenance and costly repairs. Damage and the decay of natural thatch caused by vermin and birds is unsightly and adds to maintenance costs. The use of Harvey Thatch Tiles also eliminates dust, a common occurrence with natural thatch.

Re-roofing A Thatch Roof

Everything that applies to new thatch roofs apply to re-roofing... and the hassle and disruption inside a home or building is invasive and disruptive for as long as the re-roofing process lasts. Re-roofing using Harvey Thatch is hassle-free as the existing thatch is left intact ensuring no disruption to the interior of the building, and retaining the natural warmth.

Harvey Thatch is used successfully on the roofs of acclaimed local and international lodges. This has earned it the reputation as the superior thatch alternative.

Five Reasons to Choose Harvey Thatch.

Low Maintenance

Where natural Thatch roofs require combing and repairing approximately every two years, Harvey Thatch requires very little maintenance and is made to withstand the harshest elements.

Lightning Safe

Harvey Thatch's non-combustible, fire resistant properties ensure that your roof is safe in the event of a lightning strike.

Vermin, Bird & Pest Proof

Damage from birds, monkeys and baboons quickly destroy the functionality and aesthetics of a natural thatch roof, while unsightly chicken wire covering only provides a temporary solution. In addition vermin like rats and mice gain access through the natural thatch covering. Harvey Thatch eliminates all these problems with a durable, water and airtight solution.

20 Year Warranty

Harvey Thatch is low on maintenance and has excellent functional benefits, offering a 20 year Product Warranty.

CSIR FireLab Test on Harvey Thatch 2019

Superior Fire Resistance

Natural thatch poses a significant fire risk to owners and occupants. Harvey Thatch gives you complete peace of mind as fire risk is reduced to a minimum. Harvey Thatch is certified with an 'A' Fire Rating, the highest roof material fire resistance as tested to the SANS 10177-12 standard*.

*When installed to specification
